LA GRIPPE, COUGHS, BRONCHITIS LA GRIPPE, COUGHS, BRONCHITIS

Dr. John M. Mayhew describes influenza
or La Grippe as a contagious disease, the
symptoms of which are sometimes so obscure
that a "meltitude of sins" are hid under
the diagnosis. It often comes on with a
marked chill, or possibly by several boars
of chilly sensations accompanied by succeting, which is soon followed by a distressing
cough and sweating, with pains in all parts
of the body. Unless checked the disease develops into pneumonia. First of all, the
bowels must be kept open. The patient
should be put to bed or compelled to take
obsolute rest in an easy chilt, the diet
should be tight, but should consist of nour
tshing food and one anti-kannia tablet
should be taken every two or three hours.
This treatment will usually break up the
disease in a remarkably short time. In
broughtis, coughs, coyras and all grippal
conditions, anti-kannia tablets will always
the found of great service. Anti-kannia
tablets may be obtained at all drugglists in
any quantity. Ask for A.K. Tablets. They
are also unexcelled for headaches, neuralgia
and all pain.—Advertisement.
